

Tableau

- Tableau Prep is a product used to prepare and clean data
- file types
 - Tableau workbook (.twb) - stores workbook (worksheets & dashboards) without data
 - Tableau datasource (.tds) - stores info required to access data source e.g. server address, password
 - Tableau bookmark (.tbn) - stores worksheet from other workbook (changes made to worksheet in .tbn are reflected in the workbook)
 - Tableau data extract (.tde) - stores filtered or aggregated data
 - Tableau packaged workbook (.twbx) - stores workbook with extracted data
- .twb file can be reverted back to last saved state
